

Science IV Essential Interactions

Table of Contents

Unit 1: SUSTAINING ECOSYSTEMS

Overview

Introducing the Challenge

Chapter 1: Diversity in Ecosystems

Getting Started

- 1.1 The Silence of the Frogs
- 1.2 Endangered Species
- 1.3 Extinction in the Modern World
- 1.4 Explore an Issue: What Is the Value of Wolves?
- 1.5 Ecology
- 1.6 Investigation: A Schoolyard Ecosystem
- 1.7 Career Profile: Science Teacher
- 1.8 Investigation: A Natural Ecosystem
- 1.9 Energy in Ecosystems
- 1.10 Following Energy Movement in Ecosystems
- 1.11 Roles in Ecosystems

Review

Chapter 2: Change and Stability In Ecosystems

Getting Started

- 2.1 Cycling of Matter in Ecosystems
- 2.2 Case Study: Pesticides
- 2.3 Career Profile: Planner
- 2.4 Case Study: The Interaction of Living Things
- 2.5 The Carbon Cycle
- 2.6 The Nutrient Cycle
- 2.7 Agriculture and Nutrient Cycles
- 2.8 Monitoring Changes in Populations
- 2.9 Limits on Populations
- 2.10 Explore an Issue: Should We Use Pesticides to Control Pests?

Review

Chapter 3: Sustaining Terrestrial Ecosystems

Getting Started

- 3.1 North American Biomes
- 3.2 Case Study: Biogeography
- 3.3 Soil and Its Formation
- 3.4 Investigation: Selecting Soil for a Sports Field
- 3.5 Soil Nutrients and Plant Growth
- 3.6 Investigation: The Animal Community in Soils
- 3.7 Agriculture and Food Production

Review

Chapter 4: Sustaining Aquatic Ecosystems

Getting Started

- 4.1 Abiotic Factors in Lakes
- 4.2 Sources of Water Pollution
- 4.3 Investigation: Phosphate Identification
- 4.4 Investigation: Oxygen Demand and Organic Pollutants
- 4.5 Case Study: The Great Lakes
- 4.6 Investigation: Biological Indicators of Pollution in Streams
- 4.7 Marine Ecosystems
- 4.8 Crude Oil in Marine Ecosystems
- 4.9 Explore an Issue: Can We Create a Sustainable Fishery?
- 4.10 Career Profile: Great Lakes Activist

Review

Challenge: Assessing the Environmental Effects of Human Communities

Review

Unit 2: CHEMICAL PROCESSES

Overview

Introducing the Challenge

Chapter 5: Chemicals in Action

Getting Started

- 5.1 Chemicals and Chemical Change
- 5.2 Case Study: Hazardous Household Chemicals
- 5.3 Investigation: Testing the Physical and Chemical Properties of Substances
- 5.4 Career Profile: Chemical Engineer
- 5.5 Elements and the Periodic Table
- 5.6 How Elements Form Compounds
- 5.7 Activity: Ionic Charges and Chemical Families
- 5.8 Ionic Compounds
- 5.9 Polyatomic Compounds
- 5.10 Investigation: Testing for Ions
- 5.11 Molecular Compounds
- 5.12 Hydrocarbons: A Special Group of Molecules
- 5.13 Chemical Wizardry: Synthetic Substances
- 5.14 Explore an Issue: Is "Natural" Better than Synthetic?

Review

Chapter 6: Understanding Chemical Reactions

Getting Started

- 6.1 Word Equations
- 6.2 Investigation: Measuring Masses in Chemical Changes
- 6.3 Conserving Mass
- 6.4 Investigation: Finding the Missing Mass
- 6.5 Balancing Chemical Equations
- 6.6 Combustion
- 6.7 Types of Chemical Reactions: Synthesis and Decomposition
- 6.8 Investigation: Putting Things Together
- 6.9 Investigation: Taking Things Apart
- 6.10 Types of Chemical Reactions: Single and Double Displacement
- 6.11 Investigation: Single Displacement Reactions
- 6.12 Investigation: Double Displacement Reactions
- 6.13 Activity: Putting It All Together
- 6.14 Explore an Issue: Is Pollution Necessary?
- 6.15 Career Profile: Hospital Pharmacist

Review

Chapter 7: Controlling Chemical Reactions

Getting Started

- 7.1 Investigation: Temperature and Rate
- 7.2 Investigation: Concentration and Rate
- 7.3 Factors that Affect Rates of Reaction
- 7.4 Investigation: Surface Area and Rate of Reaction
- 7.5 Catalysts and Enzymes
- 7.6 Investigation: Catalyst or Reactant?
- 7.7 Explore an Issue: Rates and Automobiles
- 7.8 Case Study: Food Preservation
- 7.9 Investigation: Exothermic and Endothermic Reactions
- 7.10 Career Profile: Explosives Expert

Review

Chapter 8: Acids and Bases

Getting Started

- 8.1 Investigation: Recognizing Acids and Bases
- 8.2 Properties of Acids and Bases
- 8.3 The pH Scale
- 8.4 Investigation: Household Products and pH
- 8.5 Investigation: Making Acids and Bases
- 8.6 Elements and Oxides
- 8.7 Case Study: Air Pollution and Acid Precipitation

- 8.8 Investigation: Acid Precipitation and Buildings
- 8.9 Investigation: Reacting Acids and Bases
- 8.10 Neutralization Reactions
- 8.11 Investigation: Testing Antacids
- 8.12 Career Profile: Environmental Specialist

Challenge: Chemical Processes and Society

Review

Unit 3: MOTION

Overview

Introducing the Challenge

Chapter 9: Distance and Speed

Getting Started

- 9.1 Explore an Issue: Progress and Speed on Our Highways
- 9.2 Measurement and Calculations
- 9.3 Case Study: Measuring Large and Small Distances
- 9.4 Investigation: Your Speed
- 9.5 Relating Speed to Distance and Time
- 9.6 Investigation: Balloon Car Contest
- 9.7 Case Study: Smart Highways
- 9.8 Investigation: Determining an Average Speed
- 9.9 Career Profile: Police Officer

Review

Chapter 10: Distance, Speed, and Acceleration

Getting Started

- 10.1 Activity: Speed Comparisons
- 10.2 Explore an Issue: Traveling Off-Road
- 10.3 Defining Acceleration
- 10.4 Investigation: Graphing Distances During Acceleration
- 10.5 Case Study: Buying a Car?
- 10.6 Instantaneous Speed
- 10.7 Analyzing Distance-Time Evidence
- 10.8 Investigation: Constant Acceleration
- 10.9 Investigation: Acceleration of Different Vehicles
- 10.10 Career Profile: Coaching Educator

Review

Chapter 11: Displacement and Velocity

Getting Started

- 11.1 Vectors: Position and Displacement
- 11.2 Activity: Walk the Graph
- 11.3 Adding Vectors Along a Straight Line
- 11.4 Activity: Adding Displacement Vectors
- 11.5 Adding Vectors at an Angle
- 11.6 Explore an Issue: Athletes on the Edge
- 11.7 Velocity
- 11.8 Career Profile: Pilot and Flight Instructor
- 11.9 Case Study: Tracking and Position

Review

Chapter 12: Displacement, Velocity, and Acceleration

Getting Started

- 12.1 Position-Time Graphs
- 12.2 Velocity-Time Graphs
- 12.3 Case Study: Technology and Skiing
- 12.4 Investigation: Speeding Up and Slowing Down
- 12.5 Acceleration and Velocity
- 12.6 Acceleration Due to Gravity
- 12.7 Investigation: Gravitational Acceleration Near Earth
- 12.8 Investigation: Acceleration of Different Masses
- 12.9 Explore an Issue: "Nothing by Authority"
- 12.10 Career Profile: Air Traffic Controller

Review

Challenge: Scientific Perspectives on Motion

Review

Unit 4: WEATHER DYNAMICS

Overview

Introducing the Challenge

Chapter 13: Global Weather Dynamics

Getting Started

- 13.1 Earth's Energy Balance
- 13.2 Investigation: Seasons and the Angle of the Sunlight
- 13.3 The Atmosphere
- 13.4 Activity: Pressure of the Atmosphere
- 13.5 Prevailing Wind Patterns
- 13.6 Case Study: The First Round-the-World Balloon Flight
- 13.7 The Hydrosphere
- 13.8 Major Ocean Currents
- 13.9 Explore an Issue: The Costs of Rescue Operations
- 13.10 Clouds and Fog
- 13.11 Investigation: What Affects the Evaporation of Water?
- 13.12 A Global Weather Model
- 13.13 Career Profile: Atmospheric Chemist

Review

Chapter 14: Forecasting the Weather

Getting Started

- 14.1 Activity: Air Speed and Air Pressure
- 14.2 North American Weather Systems
- 14.3 Case Study: Three Days of Weather
- 14.4 Regional Weather
- 14.5 Precipitation
- 14.6 Humidity
- 14.7 Investigation: Measuring Relative Humidity
- 14.8 Weather Heritage
- 14.9 Weather Forecasting Technology

- 14.10 Investigation: Forecasting the Weather
- 14.11 Explore an Issue: The Weather Forecasting Business
- 14.12 Career Profile: Forecast Meteorologist

Chapter 15: Extreme Weather Events

Getting Started

- 15.1 Activity: Weather, Records, and the News
- 15.2 Thunderstorms and Tornadoes
- 15.3 Floods and Droughts
- 15.4 Water-Wise Plant Growth: Expanding Universe
- 15.5 Hurricanes, Typhoons, and Tropical Cyclones
- 15.6 Blizzards
- 15.7 Case Study: Ice Storms
- 15.8 Extreme Heat and Cold
- 15.9 Explore an Issue: Winter Shelters for the Homeless
- 15.10 Activity: Reporting an Extreme Weather Event
- 15.11 El Niño and La Niña
- 15.12 Career Profile: Paramedic

Review

Chapter 16: Forecasting the Future

Getting Started

- 16.1 Evidence of Change
- 16.2 The Greenhouse Effect and Ozone Depletion
- 16.3 Career Profile: Forest Fire Fighter
- 16.4 Observing Pollution
- 16.5 Microclimates
- 16.6 Investigation: Temperature and Materials
- 16.7 Our Disappearing Forests
- 16.8 Case Study: Monsoons in Bangladesh
- 16.9 Weather of the Future
- 16.10 Explore an Issue: The Human Impact on Global Temperatures

Review

Challenge: Weather Wisdom

Review

Unit 5: SKILLS HANDBOOK
